# **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

Туре

[\*] Substance [A] Constituent

- [B] Impurity
- [C] Stabilizing additive

Occupational exposure limits, if available, are listed in Section 8.

# **SECTION 4: First aid measures**

| 4.1 Description of first aid n | neasures   |
|--------------------------------|--|
| Eye contact                    | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs.   |
| Inhalation                     | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband. |
| Skin contact                   | : Wash contaminated skin with soap and water. Remove contaminated clothing and shoes. To avoid the risk of static discharges and gas ignition, soak contaminated clothing thoroughly with water before removing it. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                      | : As this product is a gas, refer to the inhalation section.   |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.   |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Eye contact  | : No specific data. |  |
|--------------|---------------------|--|
| Inhalation   | : No specific data. |  |
| Skin contact | : No specific data. |  |
| Ingestion    | : No specific data. |  |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
|---------------------|---|
| Specific treatments | : No specific treatment.  |

# **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media        |   |
|--------------------------------|---|
| Suitable extinguishing media   | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known.   |
| 5.2 Special hazards arising f  | rom the substance or mixture                                    |

# Hazards from the<br/>substance or mixture: Contains gas under pressure. Extremely flammable gas. In a fire or if heated, a<br/>pressure increase will occur and the container may burst, with the risk of a<br/>subsequent explosion.

Date of issue/Date of revision

| SECTION 5: Firefigh                               | ting measures   |
|---|---|
| Hazardous combustion products                     | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |
| 5.3 Advice for firefighters                       |   |
| Special protective actions<br>for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. If involved in fire, shut off flow immediately if it can be done without risk. If this is impossible, withdraw from area and allow fire to burn. Fight fire from protected location or maximum possible distance. Eliminate all ignition sources if safe to do so. |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.   |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pr    | ote  | ctive equipment and emergency procedures  |
|---------------------------------|------|---|
| For non-emergency<br>personnel  | :    | Accidental releases pose a serious fire or explosion hazard. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing gas Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. |
| For emergency responders        | ; :  | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions   | :    | Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and materials for   | or c | ontainment and cleaning up  |
| Small spill                     | :    | Immediately contact emergency personnel. Stop leak if without risk. Use spark-<br>proof tools and explosion-proof equipment.  |
| Large spill                     | :    | Immediately contact emergency personnel. Stop leak if without risk. Use spark-<br>proof tools and explosion-proof equipment.  |
| 6.4 Reference to other sections | :    | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.   |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures : | Put on appropriate personal protective equipment (see Section 8). Contains gas<br>under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas.<br>Use only with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Store and use away from heat, sparks, open flame or any other ignition<br>source. Use explosion-proof electrical (ventilating, lighting and material handling)<br>equipment. Use only non-sparking tools. Empty containers retain product residue<br>and can be hazardous. Do not puncture or incinerate container. |
|-----------------------|--|
|-----------------------|--|

```
LPG
```

### **SECTION 7: Handling and storage**

| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional |
|--|--|
|  | information on hygiene measures.   |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Eliminate all ignition sources. Keep container tightly closed and sealed until ready for use. See Section 10 for incompatible materials before handling or use.

#### Seveso Directive - Reporting thresholds

#### Named substances

|  | Notification and MAPP threshold | Safety report threshold |
|--|---------------------------------|-------------------------|
| ✓quefied flammable gases, Category 1 or 2 (including LPG)<br>and natural gas | 50 tonne                        | 200 tonne               |

#### 7.3 Specific end use(s)

# Recommendations

: Not available. : Not available.

Industrial sector specific solutions

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

No exposure limit value known.

**Recommended monitoring procedures** If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

| Product/ingredient name    | Туре | Exposure                | Value                  | Population            | Effects  |
|----------------------------|------|-------------------------|------------------------|-----------------------|----------|
| Petroleum gases, liquefied | DMEL | Long term<br>Inhalation | 0.0664 mg/<br>m³       | General<br>population | Systemic |
|                            | DMEL | Long term<br>Inhalation | 2.21 mg/m <sup>3</sup> | Workers               | Systemic |
|                            | DNEL | Long term Dermal        | 23.4 mg/<br>kg bw/day  | Workers               | Systemic |

#### **PNECs**

No PNECs available.

# **SECTION 8: Exposure controls/personal protection**

| 8.2 Exposure controls               |   |
|-------------------------------------|---|
| Appropriate engineering<br>controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Individual protection meas          | ures  |
| Hygiene measures                    | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection                 | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                     |   |
| Hand protection                     | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. Wear suitable gloves tested to EN374. Recommended: < 1 hour<br>(breakthrough time): nitrile rubber 0.17 mm. |
| Body protection                     | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods.  |
| Other skin protection               | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection              | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Recommended: Boiling point > 65 °C: A1; Boiling point < 65 °C: AX1; Hot material: A1P2.   |
| Environmental exposure controls     | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

# **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

| s] |

|    |
|    |

# Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830 - Denmark LPG pH : Not applicable.

| pH  | : Not applicable.   |
|---|---|
| Melting point/freezing point                    | : -187.6°C  |
| Initial boiling point and<br>boiling range      | : <0°C  |
| Flash point                                     | : Closed cup: -104°C<br>Open cup: <-60°C [ASTM D92.]  |
| Evaporation rate                                | : Not available.  |
| Flammability (solid, gas)                       | : Extremely flammable in the presence of the following materials or conditions: open flames, sparks and static discharge. |
| Upper/lower flammability or<br>explosive limits | : Lower: 1.5%<br>Upper: 10%   |
| Vapor pressure                                  | : 412.9 kPa [room temperature]  |
| Vapor density                                   | : 1.5 to 2 [Air = 1]  |
| Density   | : Ø.423 g/cm³ [15°C]  |
| Solubility(ies)                                 | : Insoluble in the following materials: cold water and hot water.   |
| Partition coefficient: n-octanol/<br>water      | : 2 to 3  |
| Auto-ignition temperature                       | : >360°C  |
| Decomposition temperature                       | : >300°C  |
| Viscosity (40°C)                                | : Not available.  |
| Explosive properties                            | : Not applicable.   |
| Oxidizing properties                            | : Not applicable.   |

#### 9.2 Other information

#### SECTION 10: Stability and reactivity **10.1 Reactivity** : No specific test data related to reactivity available for this product or its ingredients. **10.2 Chemical stability** : The product is stable. **10.3 Possibility of** : Under normal conditions of storage and use, hazardous reactions will not occur. hazardous reactions 10.4 Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. **10.5 Incompatible materials** : No specific data. **10.6 Hazardous** : Under normal conditions of storage and use, hazardous decomposition products decomposition products should not be produced.

Date of issue/Date of revision

# **SECTION 11: Toxicological information**

Other information

: Not available.

# **SECTION 12: Ecological information**

12.1 Toxicity

Conclusion/Summary : Not available.

#### 12.2 Persistence and degradability

**Conclusion/Summary** : Not available.

#### 12.3 Bioaccumulative potential

| Product/ingredient name    | LogPow | BCF | Potential |
|----------------------------|--------|-----|-----------|
| Petroleum gases, liquefied | 2 to 3 | -   | low       |

| 12.4 Mobility in soil                  |                  |
|--|------------------|
| Soil/water partition coefficient (Koc) | : Not available. |
| Mobility                               | : Not available. |

### 12.5 Results of PBT and vPvB assessment

| Product/ingredient name    | PBT | Р   | В   | Т  | vPvB | vP  | vB  |
|----------------------------|-----|-----|-----|----|------|-----|-----|
| Petroleum gases, liquefied | No  | N/A | N/A | No | N/A  | N/A | N/A |

**12.6 Other adverse effects** : No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

| Product             |  |
|---------------------|--|
| Methods of disposal | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste     | <ul> <li>Within the present knowledge of the supplier, this product is not regarded as<br/>hazardous waste, as defined by EU Directive 2008/98/EC.</li> </ul>  |

#### European waste catalogue (EWC)

| Waste code |                           | Waste designation   |
|------------|---------------------------|---|
|            |                           | Not applicable.   |
| Pa         | ckaging                   |   |
| N          | lethods of disposal       | : The generation of waste should be avoided or minimized wherever possible. Empty pressure vessels should be returned to the supplier. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. |
|            |                           | : This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.  |
