| SECTION 2: Hazards | identification | |
| 2.1 Classification of the subs | stance or mixture | |
| Product definition | : Mixture | |
| Classification according to TOXIC TO REPRODUCTION | <u>Regulation (EC) No. 1272/2008 [C</u> N | _P/GHS] Category 2 H361fd |
| The product is classified as h | azardous according to Regulation (E | C) 1272/2008 as amended. |
| Ingredients of unknown toxicity | : None. | |
| Ingredients of unknown | : None. | |

ecotoxicity

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - Denmark

Q8 Brake Fluid DOT 4+

SECTION 2: Hazards identification

| Hazard pictograms | : | |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Signal word | : | Warning |
| Hazard statements | : | H361fd - Suspected of damaging fertility. Suspected of damaging the unborn child. |
| Precautionary statements | | |
| General | : | P103 - Read carefully and follow all instructions. P102 - Keep out of reach of children. P101 - If medical advice is needed, have product container or label at hand. |
| Prevention | : | P201 - Obtain special instructions before use. P280 - Wear protective gloves, protective clothing, eye protection, face protection, or hearing protection. |
| Response | 1 | P308 + P313 - IF exposed or concerned: Get medical advice or attention. |
| Storage | | P405 - Store locked up. |
| Disposal | 1 | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazardous ingredients | 4 | tris[2-[2-(2-methoxyethoxy)ethoxy]ethyl] orthoborate |
| Supplemental label elements | : | Not applicable. |
| Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles | : | Not applicable. |
| Special packaging requirem | en | <u>its</u> |
| Containers to be fitted with child-resistant fastenings | : | Not applicable. |
| Tactile warning of danger | : | Yes, applicable. |
| 2.3 Other hazards | | |
| Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII | : | This mixture does not contain any substances that are assessed to be a PBT or a vPvB. |
| Other hazards which do | ; | None known. |

not result in classification

SECTION 3: Composition/information on ingredients

| 3.2 Mixtures | : Mixture | - | 1 | 1 | - |
|----------------------------------------------------------|------------------------------------------------------------------|-------------------|------------------|----------------------------------------------------------------------|------|
| Product/ingredient name | Identifiers | % | Classification | Specific Conc. Limits, M-factors and ATEs | Туре |

| | | | See Section 16 for the full text of the H statements declared above. | | |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

| 4.1 Description of first aid r | neasures |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. |
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

4.2 Most important symptoms and effects, both acute and delayed

| Over-exposure signs/sym | <u>ptoms</u> | | | |
|--------------------------------|-------------------------------------|--------------|----------------|------|
| Eye contact | : No specific data. | | | |
| Date of issue/Date of revision | : 29-11-2023 Date of previous issue | : 13-06-2023 | Version : 1.06 | 3/17 |

SECTION 4: First aid measures

| Inhalation: Adverse symptoms may includ reduced fetal weight increase in fetal deaths skeletal malformations | de the following: |
|--------------------------------------------------------------------------------------------------------------------------|-------------------|
| Skin contact : Adverse symptoms may inclue reduced fetal weight increase in fetal deaths skeletal malformations | de the following: |
| Ingestion : Adverse symptoms may inclue reduced fetal weight increase in fetal deaths skeletal malformations | de the following: |

4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Specific treatments | : No specific treatment. |

SECTION 5: Firefighting measures

| • | | |
|---------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5.1 Extinguishing media | | |
| Suitable extinguishing media | : | Use dry chemical, CO ₂ , alcohol-resistant foam or water spray (fog). |
| Unsuitable extinguishing media | : | Do not use water jet. |
| 5.2 Special hazards arising f | rom | the substance or mixture |
| Hazards from the substance or mixture | : | In a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous combustion products | : | Decomposition products may include the following materials: carbon dioxide carbon monoxide |
| 5.3 Advice for firefighters | | |
| Special protective actions for fire-fighters | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

SECTION 6: Accidental release measures

| 6.1 Personal precautions, protective equipment and emergency procedures | | | | |
|-------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|
| For non-emergency personnel | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. | | | |
| For emergency responders | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | | | |

sections

CTION C. Assidantal valassa

| SECTION 6: ACCIO | SECTION 6: Accidental release measures | | | |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|
| 6.2 Environmental precautions | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). | | | |
| 6.3 Methods and materia | Ils for containment and cleaning up | | | |
| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. | | | |
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. | | | |
| 6.4 Reference to other | : See Section 1 for emergency contact information. | | | |

| | See Section 13 for additional waste treatment information. |
|----------------------------|------------------------------------------------------------|
| SECTION 7: Handling | and storage |

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

See Section 8 for information on appropriate personal protective equipment.

7.1 Precautions for safe handling

| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

| 7.3 Specific end use(s) | |
|----------------------------|------------------|
| Recommendations | : Not available. |
| Industrial sector specific | : Not available. |
| solutions | |

SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

8.1 Control parameters

Occupational exposure limits

| Product/ingredient name | Exposure limit values |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2-(2-methoxyethoxy)ethanol | Working Environment Authority (Denmark, 6/2022). Absorbed through skin. TWA: 10 ppm 8 hours. TWA: 50 mg/m³ 8 hours. STEL: 100 mg/m³ 15 minutes. STEL: 20 ppm 15 minutes. EU OEL (Europe, 1/2022). Absorbed through skin. Notes: list of indicative occupational exposure limit values TWA: 50.1 mg/m³ 8 hours. TWA: 10 ppm 8 hours. |
| 2-(2-butoxyethoxy)ethanol | Working Environment Authority (Denmark, 6/2022). TWA: 68 mg/m³ 8 hours. TWA: 10 ppm 8 hours. STEL: 15 ppm 15 minutes. STEL: 101 mg/m³ 15 minutes. EU OEL (Europe, 1/2022). Notes: list of indicative occupational exposure limit values TWA: 67.5 mg/m³ 8 hours. TWA: 10 ppm 8 hours. STEL: 101.2 mg/m³ 15 minutes. STEL: 15 ppm 15 minutes. |

Biological exposure indices

No exposure indices known.

Recommended monitoring procedures : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

| Product/ingredient name | Туре | Exposure | Value | Population | Effects |
|----------------------------------------------------------|--------|-------------------------|------------------------------|-----------------------|---------------|
| tris[2-[2-(2-methoxyethoxy)ethoxy] ethyl] orthoborate | DNEL | Long term Oral | 4.1 mg/kg bw/day | General population | Systemic |
| | DNEL | Long term Dermal | 4.1 mg/kg bw/day | General population | Systemic |
| | DNEL | Long term Inhalation | 7.2 mg/m ³ | General population | Systemic |
| | DNEL | Long term Dermal | 8.3 mg/kg bw/day | Workers | Systemic |
| | DNEL | Long term Inhalation | 29.1 mg/m ³ | Workers | Systemic |
| 2-[2-(2-butoxyethoxy)ethoxy]ethanol | DNEL | Long term Dermal | 2.823 mg/ cm ² | General population | Local |
| | DNEL | Short term Dermal | 4.173 mg/ cm² | General population | Local |
| | DNEL | Long term Dermal | 5.65 mg/ cm² | Workers | Local |
| e of issue/Date of revision : 29-1 | 1-2023 | Date of previous issue | : 13-06-2 | 023 | ersion : 1.06 |

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - Denmark

Q8 Brake Fluid DOT 4+

| ECTION 8: Exposure controls/personal protection | | | | | | |

PNECs

No PNECs available.

| 8.2 Exposure controls | | |
|----------------------------------|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Appropriate engineering controls | : | If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. |
| Individual protection measu | res | <u>i</u> |
| Hygiene measures | : | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |

SECTION 8: Exposure controls/personal protection

| Eye/face protection | : | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. |
|---------------------------------|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin protection | | |
| Hand protection | : | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Wear suitable gloves tested to EN374. Recommended: < 1 hour (breakthrough time): nitrile rubber 0.17 mm. |
| Body protection | : | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Other skin protection | : | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: Boiling point > 65 °C: A1; Boiling point < 65 °C: AX1; Hot material: A1P2. |
| Environmental exposure controls | : | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

| <u>Appearance</u> | |
|--------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Physical state | : Liquid. |
| Appearance | : Clear. |
| Color | : Colorless. to Amber. |
| Odor | : Mild. |
| Odor threshold | : Not available. |
| Melting point/freezing point | : <-50°C (<-58°F) [SAE J 1703] |
| Initial boiling point and boiling range | : >260°C (>500°F) [SAE J 1703] |
| Flammability | : Not applicable. |
| Lower and upper explosion limit | : Not available. |
| Flash point | : Closed cup: >100°C (>212°F) [ASTM D 93] |
| Auto-ignition temperature | : >280°C (>536°F) |
| Decomposition temperature | : >300°C |
| рН | : 7 to 10.5 [SAE J 1703] |
| Viscosity | : Kinematic (room temperature): 5 to 10 mm ² /s (5 to 10 cSt) [ASTM D 445] Kinematic (40°C (104°F)): 7.9 mm ² /s (7.9 cSt) [ASTM D 445] |
| Solubility(ies) | : |
| | |

SECTION 9: Physical and chemical properties

| Media | Result |
|------------------------------------------|--------------------------------------------------------------------------------------------------------|
| cold water hot water | Easily soluble Easily soluble |
| Solubility in water | : Not available. |
| Miscible with water | : Yes. |
| Partition coefficient: n-octa water | nol/ : 1.5 [OECD 117] |
| Vapor pressure | : 0.1 kPa (0.750061683 mm Hg) |
| Evaporation rate | : 0.01 (butyl acetate = 100 = 1) |
| Density | : 1.02 to 1.07 g/cm³ [20°C (68°F)] [DIN 51757] |
| Vapor density | : Not available. |
| Explosive properties | : Not applicable. |
| Oxidizing properties | : Not applicable. |
| Particle characteristics | |
| Median particle size | : Not applicable. |
| .2 Other information | |
| 9.2.1 Information with regar | t to physical hazard classes |
| Explosive properties | : Not applicable. |
| Oxidizing properties | : Not applicable. |
| 9.2.2 Other safety character | |
| Miscible with water | : Yes. |
| Evaporation rate | : 0.01 (butyl acetate = 100 = 1) |
| SECTION 10: Stabilit | y and reactivity |
| 0.1 Reactivity | : No specific test data related to reactivity available for this product or its ingredients |
| 0.2 Chemical stability | : The product is stable. |
| 0.3 Possibility of azardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. |
| 0.4 Conditions to avoid | : No specific data. |
| 0.5 Incompatible materials | : No specific data. |
| 0.6 Hazardous lecomposition products | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|--------------------------------------|----------------------------------|---------------------|--------------------------|----------|
| 2-[2-(2-butoxyethoxy)ethoxy] ethanol | LD50 Oral | Rat | 5300 mg/kg | - |
| 2-(2-butoxyethoxy)ethanol | LD50 Dermal LD50 Oral | Rabbit Rat | 2700 mg/kg 4500 mg/kg | - |
| Conclusion/Summary | Based on available data, the cla | assification criter | ria are not met. | |
| Acute toxicity estimates | | | | |

| Reproductive toxicity | : Suspected of damaging fertility. Suspected of damaging the unborn child. | | | |

11.2 Information on other hazards

11.2.1 Endocrine disrupting properties

Not available.

11.2.2 Other information

Not available.

SECTION 12: Ecological information

12.1 Toxicity

| Product/ingredient name | Result | Species | Exposure |
|-------------------------------------------------------|----------------------------------|----------------------------------------------|----------------------|
| Q8 Brake Fluid DOT 4+ 2-[2-(2-butoxyethoxy)ethoxy] | LC50 >100 mg/l EC50 >500 mg/l | Fish - Oncorhynchus Mykiss Aquatic plants | 96 hours 72 hours |
| ethanol | | | |
| | EC50 500 to 6600 mg/l | Daphnia | 48 hours |
| 2-(2-methoxyethoxy)ethanol | Acute EC50 >930 ppm Fresh water | Daphnia - Daphnia magna | 48 hours |
| | Acute LC50 7500 ppm Fresh water | Fish - Lepomis macrochirus | 96 hours |
| 2-(2-butoxyethoxy)ethanol | Acute LC50 1300 ppm Fresh water | Fish - Lepomis macrochirus | 96 hours |
| 0 | | | |

Conclusion/Summary

: Practically non-toxic to aquatic organisms.

12.2 Persistence and degradability

SECTION 12: Ecological information

| Product/ingredient name | Test | Result | | Dose | Inoculum |
|------------------------------------------------------------------------------------------|-------------------|---------------------|------------|------|--------------------|
| 2-[2-(2-butoxyethoxy)ethoxy] ethanol | OECD 302B | 100 % - 28 days | | - | - |
| | OECD 301E | 88 to 92 % - 28 day | s | - | - |
| Conclusion/Summary : This product is inherently biodegradable. | | | | | |
| Product/ingredient name | Aquatic half-life | | Photolysis | 5 | Biodegradability |
| tris[2-[2-(2-methoxyethoxy) ethoxy]ethyl] orthoborate 2-[2-(2-butoxyethoxy)ethoxy] | - | | - | | Readily Readily |
| ethanol | | | | | |

12.3 Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|----------------------------------------------------------|------------|------|------------|
| Q8 Brake Fluid DOT 4+ | 1.5 | - | Low |
| tris[2-[2-(2-methoxyethoxy) ethoxy]ethyl] orthoborate | <3 | - | Low |
| 2-[2-(2-butoxyethoxy)ethoxy] ethanol | 0.51 | <100 | Low |
| 2-(2-methoxyethoxy)ethanol 2-(2-butoxyethoxy)ethanol | -0.47 1 | - | Low Low |

12.4 Mobility in soil

| Soil/water partition coefficient (Koc) | : Not available. |
|----------------------------------------|-----------------------------------------------------------|
| Mobility | : Low mobility in soil predicted, based on log Kow < 3.0. |

12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

12.6 Endocrine disrupting properties

Not available.

12.7 Other adverse effects

No known significant effects or critical hazards.

SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

| Product | |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Methods of disposal | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste | : Yes. |
| European waste catalogu | ue (EWC) |

Date of issue/Date of revision

SECTION 13: Disposal considerations

| Waste code | Waste designation |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 16 01 13* | brake fluids |
| Packaging | |
| Methods of disposal | The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |

SECTION 14: Transport information

| | ADR/RID | ADN | IMDG | IATA |
|------------------------------------|----------------|----------------|----------------|----------------|
| 14.1 UN number or ID number | Not regulated. | Not regulated. | Not regulated. | Not regulated. |
| 14.2 UN proper shipping name | - | - | - | - |

| | : 4065064 |
| MAL-code | : 5-3 |
| Protection based on MAL | : According to the regulations on work involving coded products, the following stipulations apply to the use of personal protective equipment: |
| | General: Gloves must be worn for all work that may result in soiling. Apron/ coveralls/protective clothing must be worn when soiling is so great that regular work clothes do not adequately protect skin against contact with the product. A face shield must be worn in work involving spattering if a full mask is not required. In this case, other recommended use of eye protection is not required. |
| | In all spraying operations in which there is return spray, the following must be worn: respiratory protection and arm protectors/apron/coveralls/protective clothing as appropriate or as instructed. |
| | MAL-code: 5-3 Application: When spraying in new* booths if the operator is outside the spray zone. During non-atomizing spraying in existing* facilities of the combined-cabin, spray-cabin and spray-booth type where the operator is working inside the spray zone. When using scraper or knife, brush, roller, etc. for pre- and post-treatments outside a closed facility, spray booth or spray cabin. |
| | - Air-supplied full mask must be worn. |
| | When using scraper or knife, brush, roller, etc. for pre- and post-treatments in cabins or booths of the existing* facility type, if the operator is inside the spray zone. During downtimes, cleaning and repair of closed facilities, spray booths or cabins, if there is a risk of contact with wet paint or organic solvents. |
| | - Air-supplied full mask and coveralls must be worn. |
| | When spraying in existing* spray booths, if the operator is outside the spray zone. |
| Date of issue/Date of revision | : 29-11-2023 Date of previous issue : 13-06-2023 Version : 1.06 14/17 |

SECTION 15: Regulatory information

| | - Air-supplied full mask, arm protectors and apron must be worn. | | |
|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| | During all spraying where atomization occurs in cabins or spray booths where the operator is inside the spray zone and during spraying outside a closed facility, cabin or booth. | | |
| | - Air-supplied full mask, coveralls and hood must be worn. | | |
| | | | |
| | Drying: Items for drying/drying ovens that are temporarily placed on such things as rack trolleys, etc. must be equipped with a mechanical exhaust system to prevent fumes from wet items from passing through workers' inhalation zone. | | |
| | Polishing: When polishing treated surfaces, a mask with dust filter must be worn. When machine grinding, eye protection must be worn. Work gloves must always be worn. | | |
| | Caution The regulations contain other stipulations in addition to the above. | | |
| | *See Regulations. | | |
| Restrictions on use | : Not to be used by professional users below 18 years of age. See the National Working Environment Authorities Executive Order regarding Young People At Work. | | |
