# **SAFETY DATA SHEET**

### Q8 Hindemith 15

SECTION 1: Identific undertaking	ation of the substance	/mixture and of the company/
1.1 Product identifier		
Product name	: Q8 Hindemith 15	
UFI	: CT40-G066-700Y-V15Y	
1.2 Relevant identified uses	of the substance or mixture and	l uses advised against
Material uses	: Lubricating oil for hydraulic ed	quipment
1.3 Details of the supplier of	the safety data sheet	
Supplier	: Q8 Danmark A/S Arne Jacobsens Allé 17 2300 København S, Danmark Tel.: +45 7012 4545 Email: produktteknik@Q8.dk Web: www.Q8.dk	
Manufacturer / Distributor	: Kuwait Petroleum Belgium N. Petroleumkaai 7 B-2020 Antwerp Belgium	V./S.A. / Q8Oils Italia S.r.I. Via Volpedo 2 15050 Castellar Guidobono (AL) Italy
e-mail address of person responsible for this SDS	: SDSinfo@Q8.com, communi	cation preferably in English only.
PCN Information contact	: PCNinfo@Q8.com, communi	cation preferably in English only.
1.4 Emergency telephone nu	mber	
Denmark	: +45 8988 2286	CARECHEM24
Europe	: +44 (0) 1235 239 670	
Global (English only)	: +44 (0) 1865 407 333	
National advisory body/Poi		
Denmark	: Bispebjerg Hospital - poison I	ine : +45 8212 1212
SECTION 2: Hazards	identification	
2.1 Classification of the sub	stance or mixture	
Product definition	: Mixture	
	Regulation (EC) No. 1272/2008	[CLP/GHS]
ASPIRATION HAZARD		Category 1 H304
The product is classified as h	azardous according to Regulation	(EC) 1272/2008 as amended.
Ingredients of unknown toxicity	: None.	
Ingredients of unknown ecotoxicity	: None.	
-	t of the H statements declared ab	ove.
	iled information on boalth offecte	

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

Q8 Hindemith 15

# SECTION 2: Hazards identification

Hazard pictograms	:	
Signal word	:	Danger
Hazard statements	:	H304 - May be fatal if swallowed and enters airways.
Precautionary statements		
Prevention	:	Not applicable.
Response	:	P301 + P310, P331 - IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting.
Storage	1	Not applicable.
Disposal	:	P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazardous ingredients	1	Hydrocarbons, C12-C18, isoalkanes, cyclics, 2-30% aromatics
Supplemental label elements	:	Contains methyl methacrylate and N,N-bis(2-ethylhexyl)-((1,2,4-triazol-1-yl)methyl) amine. May produce an allergic reaction.
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	:	Not applicable.
Special packaging requirem	en	<u>ts</u>
Containers to be fitted with child-resistant fastenings	:	Not applicable.
Tactile warning of danger	:	Not applicable.
2.3 Other hazards		
Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	:	This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
Other hazards which do not result in classification	:	Prolonged or repeated contact may dry skin and cause irritation.

### **SECTION 3: Composition/information on ingredients**

3.2 Mixtures	: Mixture				
Product/ingredient name	Identifiers	%	Classification	Specific Conc. Limits, M-factors and ATEs	Туре
₩ydrocarbons, C12-C18, isoalkanes, cyclics, 2-30% aromatics	REACH #: 01-2120920648-49 EC: 954-225-2	≥75 - ≤90	Asp. Tox. 1, H304	-	[1]

### SECTION 3: Composition/information on ingredients

			ingrouionto		
(1,2,4-triazol-1-yl)methyl) amine	01-2119930450-49 01-0000015116-78 EC: 401-280-0 CAS: 91273-04-0 Index: 613-072-00-9		Eye Dam. 1, H318 Skin Sens. 1A, H317 Aquatic Chronic 2, H411		
O,O,O-triphenyl phosphorothioate	REACH #: 01-2119979545-21 EC: 209-909-9 CAS: 597-82-0	<0.025	Aquatic Chronic 1, H410	M [Chronic] = 10	[1]
			See Section 16 for the full text of the H statements declared above.		

\* Contains one or more of the following:

CAS: 64742-54-7, EC: 265-157-1, EU REACH: 01-2119484627-25

CAS: 64742-55-8, EC: 265-158-7, EU REACH: 01-2119487077-29

The mineral base oils contained in this product are severely refined and contain less than 3% DMSO extract according to IP 346 method, and are therefore not classified as carcinogen according to Regulation (EC) No 1272/2008, note L.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact	:	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	:	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	:	Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse. High pressure skin injections are serious medical emergencies. Injury will not appear serious at first. Within a few hours, tissue will become swollen, discolored and extremely painful.
Ingestion	:	Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Protection of first-aiders	:	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

#### 4.2 Most important symptoms and effects, both acute and delayed

Date of issue/Date of revision	: 28-04-2025	Date of previous issue	: 03-10-2023	Version	:1.09	3/21
--------------------------------	--------------	------------------------	--------------	---------	-------	------

### **SECTION 4: First aid measures**

Over-exposure signs	'symptoms
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: irritation dryness cracking
Ingestion	: Adverse symptoms may include the following: nausea or vomiting

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	<ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.</li> </ul>
Specific treatments	: No specific treatment.

### **SECTION 5: Firefighting measures**

e dry chemical, CO <sub>2</sub> , alcohol-resistant foam or water spray (fog).	
) not use water jet.	
e substance or mixture	
a fire or if heated, a pressure increase will occur and the container may	y burst.
rbon dioxide	
ere is a fire. No action shall be taken involving any personal risk or with	
eathing apparatus (SCBA) with a full face-piece operated in positive pre ode. Clothing for fire-fighters (including helmets, protective boots and g nforming to European standard EN 469 will provide a basic level of pro	essure gloves)
: Do rom th : In : De ca ca : Pro the sui : Fir bre mo col	<ul> <li>Use dry chemical, CO<sub>2</sub>, alcohol-resistant foam or water spray (fog).</li> <li>Do not use water jet.</li> <li>Tom the substance or mixture <ul> <li>In a fire or if heated, a pressure increase will occur and the container may</li> <li>Decomposition products may include the following materials: carbon dioxide carbon monoxide</li> </ul> </li> <li>Promptly isolate the scene by removing all persons from the vicinity of the there is a fire. No action shall be taken involving any personal risk or with suitable training.</li> <li>Fire-fighters should wear appropriate protective equipment and self-contabreathing apparatus (SCBA) with a full face-piece operated in positive premode. Clothing for fire-fighters (including helmets, protective boots and g conforming to European standard EN 469 will provide a basic level of pro chemical incidents.</li> </ul>

### **SECTION 6: Accidental release measures**

6.1 Personal precautions, pro	te	ctive equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### SECTION 6: Accidental release measures

6.3 Methods and material	s for containment and cleaning up
Small spill	: Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations.
6.4 Reference to other sections	: See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Protective measures	Put on appropriate personal protective equipment (see Section 8). Do not swallow. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### 7.3 Specific end use(s)

**Recommendations** Industrial sector specific : Not available. solutions

- : Not available.

### SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

**Occupational exposure limits** 

### SECTION 8: Exposure controls/personal protection

Product/ingredient name	Exposure limit values
Severely refined mineral oil (C15 - C50) * -	EU OEL (Europe)
H304	TWA 8 hours: 5 mg/m <sup>3</sup> . Form: Mist.
	STEL 15 minutes: 10 mg/m <sup>3</sup> . Form: Mist.
methyl methacrylate	Working Environment Authority (Denmark, 3/2024) Absorbed
	through skin.
	TWA 8 hours: 25 ppm.
	TWA 8 hours: 102 mg/m <sup>3</sup> .
	STEL 15 minutes: 100 ppm.
	EU OEL (Europe, 1/2022)
	TWA 8 hours: 50 ppm.
	STEL 15 minutes: 100 ppm.

#### **Biological exposure indices**

No exposure indices known.

Recommended monitoring procedures

: Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

Q8 Hindemith 15

### **SECTION 8: Exposure controls/personal protection**

8.2 Exposure controls		
Appropriate engineering controls	:	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Individual protection measured	ures	
Hygiene measures	:	Do not ingest. If swallowed then seek immediate medical assistance.
Eye/face protection	:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection		
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Wear suitable gloves tested to EN374. Recommended: < 1 hour (breakthrough time): nitrile rubber 0.17 mm. Provide employee with skin care programmes.
Body protection	:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	:	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: Boiling point > 65 °C: A1; Boiling point < 65 °C: AX1; Hot material: A1P2. Gas and combination filter cartridges should comply with the European standard EN14387.
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid. [Oily liquid.]
Appearance	: 🕅ear
Color	: Yellow [Light]
Odor	: Characteristic.
Odor threshold	: Not available.
Melting point/freezing point	: Not applicable.
Pour point	: <-42°C (<-43.6°F) [ASTM D 97]
Boiling point or initial boiling point and boiling range	: >200°C (>392°F)
Flammability	: Not applicable.

SECTION 9: Physical and chemical properties
---

Lower and upper explosion limit	: Not available.
Flash point	: Øpen cup: >100°C (>212°F) [ASTM D 92]
Auto-ignition temperature	: >300°C (>572°F)
Decomposition temperature	: >200°C
рН	: Not applicable.
Viscosity	<ul> <li>Kinematic (40°C (104°F)): 15 mm²/s (15 cSt) [ASTM D 445]</li> <li>Kinematic (100°C (212°F)): 5.6 mm²/s (5.6 cSt) [ASTM D 445]</li> </ul>

#### Solubility

Media	Result
cold water hot water	Not soluble Not soluble
Partition coefficient n-octanol/ water (log Pow)	Not applicable.
Vapor pressure	<0.01 kPa (<0.075006 mm Hg)
Density	0.87 g/cm³ [15°C (59°F)] [ASTM D 4052]
Relative vapor density	Not available.
Particle characteristics	
Median particle size	Not applicable.

#### 9.2 Other information

9.2.1 Information with rega	rd to physical hazard classes
<b>Explosive properties</b>	: Not applicable.
Oxidizing properties	: Not applicable.
9.2.2 Other safety characte	ristics

2

Not applicable.

### **SECTION 10: Stability and reactivity**

10.1 Reactivity	:	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	:	The product is stable.
10.3 Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	:	No specific data.
10.5 Incompatible materials	:	Reactive or incompatible with the following materials: Strong oxidizing materials
10.6 Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

### **SECTION 11:** Toxicological information

11.1 Information on hazard classes as defined in Re	egulation (EC) No 1272/2008
Acute toxicity	
Product/ingredient name	Result Rat - Oral - LD50
2-30% aromatics	>4150 mg/kg
	Rabbit - Dermal - LD50 >1700 mg/kg
	Rat - Inhalation - LC50 Dusts and mists 5.28 mg/l [4 hours]
Severely refined mineral oil (C15 - C50) * - H304	<b>Rabbit - Dermal - LD50</b> >5000 mg/kg
	<b>Rat - Oral - LD50</b> >5000 mg/kg
	Rat - Male, Female - Inhalation - LC50 Dusts and mists 5.53 mg/l [4 hours] Acute Inhalation Toxicity
methyl methacrylate	<b>Rat - Oral - LD50</b> 7872 mg/kg
	<u>Toxic effects</u> : Behavioral - Muscle weakness Behavioral - Coma Lung, Thorax, or Respiration - Respiratory depression
	<b>Rabbit - Dermal - LD50</b> >5 g/kg
	Toxic effects: Skin After systemic exposure - Dermatitis, other
	Rat - Inhalation - LC50 Vapor 78000 mg/m³ [4 hours]

**Conclusion/Summary [Product]** : Not available.

#### Acute toxicity estimates

Product/ingredient name	Oral (mg/ kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapors) (mg/l)	Inhalation (dusts and mists) (mg/l)
Hydrocarbons, C12-C18, isoalkanes, cyclics, 2-30% aromatics	N/A	N/A	N/A	N/A	5.28
Severely refined mineral oil (C15 - C50) * - H304 methyl methacrylate	N/A 7872	N/A N/A	N/A N/A	N/A 78	5.53 N/A

#### Skin corrosion/irritation

#### Product/ingredient name

Severely refined mineral oil (C15 - C50) \* -H304

#### Result

#### Rabbit - Skin - Erythema/Eschar

<u>Duration of treatment/exposure</u>: 72 hours <u>Observation period</u>: 7 days <u>Irritation score</u>: 0.17 Fully reversible in 7 days or less

#### Rabbit - Skin - Edema

<u>Duration of treatment/exposure</u>: 72 hours <u>Observation period</u>: 7 days <u>Irritation score</u>: 0 Fully reversible in 7 days or less

### **SECTION 11: Toxicological information**

**Conclusion/Summary [Product]** : Not available.

#### **12.6 Endocrine disrupting properties**

**Conclusion/Summary [Product]** 

: The product does not meet the criteria to be considered as having endocrine disrupting properties according to the criteria set out in either Regulation (EC) No. 1907/2006 or Regulation (EC) No 1272/2008.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

<u>Product</u>	
Methods of disposal	: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	: Yes.

#### European waste catalogue (EWC)

Waste code	Waste designation
13 01 10*	mineral based non-chlorinated hydraulic oils
Packaging	
Methods of disposal	<ul> <li>The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.</li> </ul>
Special precautions	: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

#### Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Classification	Justification
Asp. Tox. 1, H304	Calculation method

The mineral base oils contained in this product are severely refined and contain less than 3% DMSO extract according to IP 346 method, and are therefore not classified as carcinogen according to Regulation (EC) No 1272/2008, note L.

Note L: The classification as a carcinogen need not apply if it can be shown that the substance contains less than 3 % DMSO extract as measured by IP 346 "Determination of polycyclic aromatics in unused lubricating base oils and asphaltene free petroleum fractions — Dimethyl sulphoxide extraction refractive index method", Institute of Petroleum, London. This note applies only to certain complex oil-derived substances in Part 3.

#### Full text of abbreviated H statements

<b>⊮</b> 225	Highly flammable liquid and vapor.
H304	May be fatal if swallowed and enters airways.
H314	Causes severe skin burns and eye damage.
H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H335	May cause respiratory irritation.
H410	Very toxic to aquatic life with long lasting effects.
H411	Toxic to aquatic life with long lasting effects.
