## SAFETY DATA SHEET

## Q8 Fuelolie 45

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

: Q8 Fuelolie 45 **Product name Index number** : 649-024-00-9 **EC** number : 270-675-6

**REACH Registration number** 

Registration number	Legal entity
01-2119474894-22	-

: 68476-33-5 **CAS** number

## 1.2 Relevant identified uses of the substance or mixture and uses advised against

**Material uses** : Fuel for heating equipment

**Identified uses** 

Manufacture of substance

Distribution of substance

Formulation and (re)packing of substances and mixtures

Use in fuel - Industrial Use in fuel - Professional

Uses advised against	Reason
✓se in coatings - Professional	-
Use in road and construction products - Professional	-

## 1.3 Details of the supplier of the safety data sheet

**Manufacturer / Distributor** : Q8 Danmark A/S

Arne Jacobsens Allé 7 2300 København S.

Danmark

Tel. 7012 4545, Fax 4599 2020

Email: produktservice@Q8.dk, Web: www.Q8.dk

e-mail address of person responsible for this SDS

: SDSinfo@Q8.com, communication preferably in English only.

## 1.4 Emergency telephone number

**Denmark** : +45 8988 2286

**Europe** : +44 (0) 1235 239 670 Global (English only) : +44 (0) 1865 407 333

Date of issue/Date of revision :01-12-2017 :05-09-2018 Date of previous issue Version : 1.05 1/31

## **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

Product definition : UVCB

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

ACUTE TOXICITY

CARCINOGENICITY

CATEGORY 4

CATEGORY 1B

H350

TOXIC TO REPRODUCTION

CATEGORY 2

H361fd

SPECIFIC TARGET ORGAN TOXICITY (REPEATED)

CATEGORY 2

H373

EXPOSURE)

ASPIRATION HAZARD Category 1 H304
AQUATIC HAZARD (ACUTE) Category 1 H400
AQUATIC HAZARD (LONG-TERM) Category 1 H410

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Ingredients of unknown

toxicity

: None.

Ingredients of unknown

ecotoxicity

: None.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

Hazard pictograms

Signal word : Danger

Hazard statements : H332 - Harmful if inhaled.

H350 - May cause cancer.

H361fd - Suspected of damaging fertility. Suspected of damaging the unborn child.

H304 - May be fatal if swallowed and enters airways.

H373 - May cause damage to organs through prolonged or repeated exposure.

H410 - Very toxic to aquatic life with long lasting effects.

**Precautionary statements** 

**Prevention**: P201 - Obtain special instructions before use.

P260 - Do not breathe dust/fume/gas/mist/vapors/spray.

P273 - Avoid release to the environment.

P280 - Wear protective gloves/protective clothing/eye protection/face protection.

Response : P301 - IF SWALLOWED:

P310 - Immediately call a POISON CENTER or physician.

P331 - Do NOT induce vomiting.

**Storage**: P405 - Store locked up.

Disposal : P501 - Dispose of contents and container in accordance with all local, regional,

national and international regulations.

**Hazardous ingredients** 

Supplemental label

elements

: Fuel oil, residual

: Repeated exposure may cause skin dryness or cracking.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles : Restricted to professional users.

**Special packaging requirements** 

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 2/31

## **SECTION 2: Hazards identification**

Containers to be fitted with child-resistant

: Not applicable.

fastenings

Tactile warning of danger : Not applicable.

### 2.3 Other hazards

Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

: Not available.

Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

: Not available.

Other hazards which do not result in classification

Prolonged or repeated contact may dry skin and cause irritation. Hazardous concentrations of hydrogen sulphide (H2S) gas may accumulate in the vapour space of storage vessels. Standard procedures for opening or entering tanks, vessels or other containers must strictly be followed to avoid inhalation of this acutely toxic gas.

## **SECTION 3: Composition/information on ingredients**

3.1 Substances : UVCB

Product/ingredient name	Identifiers	%	Regulation (EC) No. 1272/2008 [CLP]	Туре	Notes
Fuel oil, residual	REACH #: 01-2119474894-22 EC: 270-675-6 CAS: 68476-33-5 Index: 649-024-00-9	100	Acute Tox. 4, H332 Carc. 1B, H350 Repr. 2, H361fd (Fertility and Unborn child) STOT RE 2, H373 Asp. Tox. 1, H304 Aquatic Acute 1, H400 (M=1) Aquatic Chronic 1, H410 (M=1) EUH066 See Section 16 for the full text of the H statements declared above.	[A]	Н

The mineral oils in the product contain < 3% DMSO extract (IP 346).

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

## <u>Type</u>

- [\*] Substance
- [A] Constituent
- [B] Impurity
- [C] Stabilizing additive

Occupational exposure limits, if available, are listed in Section 8.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 3/31

## **SECTION 4: First aid measures**

## 4.1 Description of first aid measures

**Eye contact** 

: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

Inhalation

: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If exposure to hydrogen sulphide is suspected or cannot be excluded, obtain medical attention IMMEDIATELY. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin contact

: Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion

: Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

### **Protection of first-aiders**

: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

### 4.2 Most important symptoms and effects, both acute and delayed

## Over-exposure signs/symptoms

**Eye contact** : No specific data.

**Inhalation** : Adverse symptoms may include the following:

reduced fetal weight increase in fetal deaths skeletal malformations

**Skin contact**: Adverse symptoms may include the following:

irritation dryness cracking

reduced fetal weight increase in fetal deaths skeletal malformations

**Ingestion** : Adverse symptoms may include the following:

nausea or vomiting reduced fetal weight increase in fetal deaths skeletal malformations

## 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician

: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 4/31

## **SECTION 4: First aid measures**

**Specific treatments** : No specific treatment.

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

Suitable extinguishing media

: Use dry chemical, CO<sub>2</sub>, alcohol-resistant foam or water spray (fog).

**Unsuitable extinguishing** 

: Do not use water jet.

## media

## 5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture

: In a fire or if heated, a pressure increase will occur and the container may burst. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

**Hazardous combustion** products

Decomposition products may include the following materials: carbon dioxide

carbon monoxide sulfur oxides Hydrogen sulphide

## 5.3 Advice for firefighters

Special protective actions for fire-fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

**Special protective** equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

## 6.2 Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

## 6.3 Methods and materials for containment and cleaning up

**Small spill** 

: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Date of issue/Date of revision :01-12-2017 :05-09-2018 Version : 1.05 5/31 Date of previous issue

## **SECTION 6: Accidental release measures**

### Large spill

: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

## 6.4 Reference to other sections

: See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

### **Protective measures**

Put on appropriate personal protective equipment (see Section 8). Avoid exposure obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not swallow. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Hazardous concentrations of hydrogen sulphide (H2S) gas may accumulate in the vapour space of storage vessels. Standard procedures for opening or entering tanks, vessels or other containers must strictly be followed to avoid inhalation of this acutely toxic gas.

# Advice on general occupational hygiene

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Provide adequate ventilation. See Section 10 for incompatible materials before handling or use.

### Seveso Directive - Reporting thresholds (in tonnes)

## **Named substances**

Name	Notification and MAPP threshold	Safety report threshold
Fuel oil, residual	2500	25000

### 7.3 Specific end use(s)

Recommendations : Not available.

Industrial sector specific : Not available.

solutions

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 6/31

## **SECTION 8: Exposure controls/personal protection**

The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 8.1 Control parameters

### Occupational exposure limits

No exposure limit value known.

## Recommended monitoring procedures

: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### **DNELs/DMELs**

No DNELs/DMELs available.

### **PNECs**

No PNECs available.

## 8.2 Exposure controls

## Appropriate engineering controls

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Product may release hydrogen sulphide: a specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water and unintentional releases should be made to help determine controls appropriate to local circumstances.

### **Individual protection measures**

## **Hygiene measures**

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

## **Eye/face protection**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

## **Skin protection**

**Hand protection** 

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Wear suitable gloves tested to EN374. Recommended: < 1 hour (breakthrough time): nitrile rubber 0.17 mm.

## **Body protection**

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 7/31

## **SECTION 8: Exposure controls/personal protection**

Other skin protection

: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** 

: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: Boiling point > 65 °C: A1; Boiling point < 65 °C: AX1; Hot material: A1P2.

**Environmental exposure** controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## SECTION 9: Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

**Appearance** 

Physical state : Liquid. [Viscous liquid.]

Appearance : Opaque.
Color : Black.

Odor threshold : Characteristic.

Odor threshold : Not applicable.

pH : 7
Melting point/freezing point : <30°C
Initial boiling point and : 202 to 511°C

boiling range

Flash point : Closed cup: >60°C

Open cup: >60°C [ASTM D92.]

Evaporation rate : Not applicable.

Flammability (solid, gas) : Not applicable.

Upper/lower flammability or explosive limits : Lower: 1%

Upper: 6%

**Vapor pressure** : <0.1 kPa [room temperature]

Vapor density : Not available.

Relative density : 0.99

**Solubility(ies)** : Insoluble in the following materials: cold water and hot water.

**Dispersibility properties**: Not dispersible in the following materials: cold water and hot water.

Partition coefficient: n-octanol/ : 4 to 6

water

Auto-ignition temperature : 250 to 537°C

Decomposition temperature : >220°C

Viscosity (40°C) : Not available.

Viscosity (100°C) : 34.35 cSt

Explosive properties : Not applicable.

Oxidizing properties : Not applicable.

### 9.2 Other information

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 8/31

## Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830 - Denmark

Q8 Fuelolie 45

## **SECTION 10: Stability and reactivity**

10.1 Reactivity : No specific test data related to reactivity available for this product or its ingredients.

**10.2 Chemical stability** : The product is stable.

10.3 Possibility of hazardous reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

**10.4 Conditions to avoid** : No specific data.

**10.5 Incompatible materials** : Reactive or incompatible with the following materials:

Strong oxidizing materials

10.6 Hazardous decomposition products

Decomposition products may include the following materials: sulfur oxides

Hydrogen sulphide

## **SECTION 11: Toxicological information**

## 11.1 Information on toxicological effects

### **Acute toxicity**

Product/ingredient name	Result	Species	Dose	Exposure
Fuel oil, residual	LC50 Inhalation Dusts and mists LD50 Dermal	Rat - Male, Female Rabbit - Male, Female	3	4 hours
	LD50 Oral	Rat - Female	4320 mg/kg	-

**Conclusion/Summary**: Not available.

## **Irritation/Corrosion**

Product/ingredient name	Result	Species	Score	Exposure	Observation
Fuel oil, residual	Skin - Edema Eyes - Redness of the conjunctivae	Rat Rabbit	0.7 1.7	24 hours -	7 days 72 hours

Conclusion/Summary

: Not available.

## **Sensitization**

Product/ingredient name	Route of exposure	Species	Result
Fuel oil, residual	skin	Rat	Not sensitizing

## Conclusion/Summary

Skin : Not sensitizing

## **Mutagenicity**

Product/ingredient name	Test	Experiment	Result
Fuel oil, residual	476 In vitro Mammalian	Subject: Mammalian-Animal	Positive Negative

## **Conclusion/Summary**

: Not available.

## Carcinogenicity

Product/ingredient name	Result	Species	Dose	Exposure
Fuel oil, residual	Positive - Dermal - TC	Mouse - Male, Female	1000 mg/kg	2 days per week

**Conclusion/Summary**: Not available.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 9/31

## Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830 - Denmark

Q8 Fuelolie 45

## **SECTION 11: Toxicological information**

**Reproductive toxicity** 

**Conclusion/Summary**: Not available.

**Teratogenicity** 

Product/ingredient name	Result	Species	Dose	Exposure
Fuel oil, residual	Positive - Dermal	Rat - Male, Female	0.05 mg/kg	6 hours per day

Conclusion/Summary: Not available.

Specific target organ toxicity (single exposure)

Not available.

## Specific target organ toxicity (repeated exposure)

Product/ingredient name	Category	Route of exposure	Target organs
Fuel oil, residual	Category 2	Not determined	Not determined

## **Aspiration hazard**

Product/ingredient name	Result
Fuel oil, residual	ASPIRATION HAZARD - Category 1

Information on the likely

routes of exposure

: Not available.

Potential acute health effects

**Eye contact**: No known significant effects or critical hazards.

Inhalation : Harmful if inhaled.

**Skin contact**: Defatting to the skin. May cause skin dryness and irritation.

**Ingestion** : May be fatal if swallowed and enters airways.

## Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : No specific data.

**Inhalation** : Adverse symptoms may include the following:

reduced fetal weight increase in fetal deaths skeletal malformations

**Skin contact**: Adverse symptoms may include the following:

irritation dryness cracking

reduced fetal weight increase in fetal deaths skeletal malformations

**Ingestion** : Adverse symptoms may include the following:

nausea or vomiting reduced fetal weight increase in fetal deaths skeletal malformations

## Delayed and immediate effects and also chronic effects from short and long term exposure

**Short term exposure** 

Potential immediate : Not available.

effects

Potential delayed effects : Not available.

**Long term exposure** 

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 10/31

## Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830 - Denmark

Q8 Fuelolie 45

## **SECTION 11: Toxicological information**

**Potential immediate** 

effects

: Not available.

Potential delayed effects : Not available.

Potential chronic health effects

Product/ingredient name	Result	Species	Dose	Exposure
Fuel oil, residual	Sub-chronic NOAEL Dermal	Rat - Male, Female	1.06 mg/kg	13 weeks; 5 days per week

Conclusion/Summary : Not available.

General : May cause damage to organs through prolonged or repeated exposure. Prolonged

or repeated contact can defat the skin and lead to irritation, cracking and/or

dermatitis.

**Carcinogenicity** : May cause cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.Teratogenicity : Suspected of damaging the unborn child.

**Developmental effects**: No known significant effects or critical hazards.

Fertility effects : Suspected of damaging fertility.

Other information : Not available.

## **SECTION 12: Ecological information**

## 12.1 Toxicity

PBT : Not available.

P: Not available. B: Not available. T: Yes.

vPvB : Not available.

vP: Not available. vB: Not available.

**12.6 Other adverse effects**: No known significant effects or critical hazards.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 11/31

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

### **Product**

**Methods of disposal** 

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

### **Hazardous waste**

: Yes.

### European waste catalogue (EWC)

Waste code	Waste designation
13 07 01*	fuel oil and diesel

## **Packaging**

Methods of disposal

: The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

## **Special precautions**

: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## **SECTION 14: Transport information**

user

14.6 Special precautions for : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

## SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorization

**Annex XIV** 

None of the components are listed.

Substances of very high concern

None of the components are listed.

**Annex XVII - Restrictions**: Restricted to professional users. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

Other EU regulations

Ozone depleting substances (1005/2009/EU)

Not listed.

Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

**Seveso Directive** 

This product is controlled under the Seveso Directive.

**Named substances** 

## Name

Petroleum products and alternative fuels (a) gasolines and naphthas, (b) kerosenes (including jet fuels), (c) gas oils (including diesel fuels, home heating oils and gas oil blending streams) (d) heavy fuel oils (e) alternative fuels serving the same purposes and with similar properties as regards flammability and environmental hazards as the products referred to in points (a) to (d)

## **National regulations**

Date of issue/Date of revision :05-09-2018 :01-12-2017 Version : 1.05 13/31 Date of previous issue

## **SECTION 15: Regulatory information**

Product/ingredient name	List name	Name on list	Classification	Notes
Fuel oil, residual		Brændselsolier Defineret ved EINECS-numrene 271-384-7, 270-675-6, 270-674-0 og 295-396-7 * Se også fyringsolier, tunge	Listed	-

**Product registration** 

number

: PR-nr: 1693161

**Danish fire class** 

: 111-1

**Denmark - Cancer risks** 

: National Working Environment Authorities Ordinance on Measures to Prevent Cancer Risks during Work with Substances and Preparations is applicable.

**MAL-code** 

: 5-6

**Protection based on MAL** 

: According to the regulations on work involving coded products, the following stipulations apply to the use of personal protective equipment:

**General:** Gloves must be worn for all work that may result in soiling. Apron/coveralls/protective clothing must be worn when soiling is so great that regular work clothes do not adequately protect skin against contact with the product. A face shield must be worn in work involving spattering if a full mask is not required. In this case, other recommended use of eye protection is not required.

In all spraying operations in which there is return spray, the following must be worn: respiratory protection and arm protectors/apron/coveralls/protective clothing as appropriate or as instructed.

MAL-code: 5-6

**Application:** When using scraper or knife, brush, roller etc. for pre- and post-treatments in a spray booth where the operator is outside the spray zone and when working in similar new\* facilities of the combined-cabin, spray-cabin and spray-booth type where the operator is working inside the spray zone. When spraying in new\* booths and cabins with non-atomizing guns.

- Protective clothing must be worn.

During non-atomizing spraying in existing\* facilities of the combined-cabin, spray-cabin and spray-booth type where the operator is working inside the spray zone. When spraying in existing\* spray booths, if the operator is outside the spray zone. When using scraper or knife, brush, roller, etc. for pre- and post-treatments in cabins or booths of the existing\* facility type, if the operator is inside the spray zone. When using scraper or knife, brush, roller, etc. for pre- and post-treatments outside a closed facility, spray booth or spray cabin. During downtimes, cleaning and repair of closed facilities, spray booths or cabins, if there is a risk of contact with wet paint or organic solvents.

- Air-supplied full mask and protective clothing must be worn.

When spraying in new\* booths if the operator is outside the spray zone.

- Air-supplied full mask must be worn.

During all spraying where atomization occurs in cabins or spray booths where the operator is inside the spray zone and during spraying outside a closed facility, cabin or booth.

- Air-supplied full mask, protective clothing and hood must be worn.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 14/31

## **SECTION 15: Regulatory information**

**Drying:** Items for drying/drying ovens that are temporarily placed on such things as rack trolleys, etc. must be equipped with a mechanical exhaust system to prevent fumes from wet items from passing through workers' inhalation zone.

**Polishing:** When polishing treated surfaces, a mask with dust filter must be worn. When machine grinding, eye protection must be worn. Work gloves must always be worn.

**Caution** The regulations contain other stipulations in addition to the above.

\*See Regulations.

Restrictions on use : Not to be used by professional users below 18 years of age. See the National

Working Environment Authorities Executive Order regarding Young People At Work.

**Carcinogenic waste** : Waste containers must be labeled: Contains a substance or substances regulated

by Danish working environment legislation on cancer risks.

Hazard class for water

(WGK)

: 3

VOC content : VOC (w/w): 100%

**International regulations**

15.2 Chemical Safety

Assessment

: Complete.

Date of issue/Date of revision :05-09-2018 Date of previous issue :01-12-2017 Version :1.05 15/31

## **SECTION 16: Other information**

Indicates information that has changed from previously issued version.

**Abbreviations and** 

acronyms

: ATE = Acute Toxicity Estimate

CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No.

1272/2008]

DMEL = Derived Minimal Effect Level
DNEL = Derived No Effect Level

EUH statement = CLP-specific Hazard statement PBT = Persistent, Bioaccumulative and Toxic PNEC = Predicted No Effect Concentration RRN = REACH Registration Number

vPvB = Very Persistent and Very Bioaccumulative

## Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Classification	Justification
Acute Tox. 4, H332	On basis of test data
Carc. 1B, H350	Expert judgment
Repr. 2, H361fd (Fertility and Unborn child)	Expert judgment
STOT RE 2, H373	Expert judgment
Asp. Tox. 1, H304	Expert judgment
Aquatic Acute 1, H400 (M=1)	Expert judgment
Aquatic Chronic 1, H410 (M=1)	Expert judgment

## Full text of abbreviated H statements

H304	May be fatal if swallowed and enters airways.
H332	Harmful if inhaled.
H350	May cause cancer.
H361fd	Suspected of damaging fertility. Suspected of damaging the unborn child.
H373	May cause damage to organs through prolonged or repeated exposure.
H400	Very toxic to aquatic life.
H410	Very toxic to aquatic life with long lasting effects.

## Full text of classifications [CLP/GHS]

Acute Tox. 4, H332 Aquatic Acute 1, H400	ACUTE TOXICITY (inhalation) - Category 4 AQUATIC HAZARD (ACUTE) - Category 1
Aquatic Chronic 1, H410	AQUATIC HAZARD (LONG-TERM) - Category 1
Asp. Tox. 1, H304	ASPIRATION HAZARD - Category 1
Carc. 1B, H350	CARCINOGENICITY - Category 1B
EUH066	Repeated exposure may cause skin dryness or cracking.
Repr. 2, H361fd	TOXIC TO REPRODUCTION (Fertility and Unborn child) -
	Category 2
STOT RE 2, H373	SPECIFIC TARGET ORGAN TOXICITY (REPEATED
	EXPOSURE) - Category 2

**Training advice** : Ensure operatives are trained to minimise exposures.

# Annex to the extended Safety Data Sheet (eSDS)

Industrial

### Identification of the substance or mixture

**Product definition** : UVCB

**Product name** : Q8 Fuelolie 45

## **Section 1 Title**

Short title of the exposure

scenario

: Manufacture of Heavy Fuel Oil - Industrial

List of use descriptors

: Identified use name: Manufacture of substance

Process Category: PROC01, PROC02, PROC03, PROC08a, PROC08b, PROC15

Substance supplied to that use in form of: As such

Sector of end use: SU03, SU08, SU09

Subsequent service life relevant for that use: No.

Environmental Release Category: ERC01, ESVOC SPERC 1.1.v1

Market sector by type of chemical product: PC13

Article category related to subsequent service life: Not applicable.

**Processes and activities** covered by the exposure

scenario

: Manufacture of the substance or use as a process chemical or extraction agent within closed or contained systems. Includes incidental exposures during recycling/ recovery, material transfers, storage, sampling, associated laboratory activities,

maintenance and loading (including marine vessel/barge, road/rail car and bulk

container).

: See section 3. Assessment method

## Section 2 Operational conditions and risk management measures

### Section 2.1 Control of consumer exposure

**Concentration of** 

substance in mixture or

article

: Covers percentage substance in the product up to 100% (unless stated differently).

: Liquid, vapor pressure < 0.5 kPa at Standard Temperature and Pressure

**Amounts used** : Not applicable.

use/exposure

**Physical state** 

Frequency and duration of : Covers daily exposures up to 8 hours

**Human factors not** influenced by risk

management

Other conditions affecting

workers exposure

: Operation is carried out at elevated temperature (> 20°C above ambient temperature) Assumes a good basic standard of occupational hygiene is

implemented

: Not applicable.

### Contributing scenarios: Operational conditions and risk management measures

General measures (carcinogens): Consider technical advances and process upgrades (including automation) for the elimination of releases.

Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation.

Drain down systems and clear transfer lines prior to breaking containment.

Clean/flush equipment, where possible, prior to maintenance.

Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and dispose of wastes safely.

Ensure safe systems of work or equivalent arrangements are in place to manage risks.

Regularly inspect, test and maintain all control measures.

Consider the need for risk-based health surveillance.

## Section 2 Operational conditions and risk management measures

General exposures (closed systems): Handle substance within a closed system. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Process sampling Outdoor: Sample via a closed loop or other system to avoid exposure. Avoid carrying out activities involving exposure for more than 15 minutes. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Bulk product storage: Store substance within a closed system. Sample via a closed loop or other system to avoid exposure. Avoid carrying out activities involving exposure for more than 4 hours. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Laboratory activities: Handle within a fume cupboard or implement suitable equivalent methods to minimise exposure. Wear suitable gloves tested to EN374.

Marine vessel/barge (un)loading: Avoid carrying out activities involving exposure for more than 4 hours. Transfer via enclosed lines. Clear transfer lines prior to de-coupling. Retain drain-downs in sealed storage pending disposal or for subsequent recycle. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Road tanker/rail car loading: Ensure material transfers are under containment or extract ventilation. Wear chemicalresistant gloves (tested to EN374) in combination with 'basic' employee training.

Equipment cleaning and maintenance: Drain down and flush system prior to equipment break-in or maintenance. Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training. Retain drain-downs in sealed storage pending disposal or for subsequent recycle.

## Section 2.2 Control of environmental exposure

## **Product characteristics**

**Amounts used** 

: Substance is complex UVCB.. Predominantly hydrophobic

: Fraction of EU tonnage used in region 0.1

Regional use tonnage 1.1E7

Fraction of regional tonnage used locally 5.2E-2

Annual site tonnage 6.0E5

Maximum daily site tonnage 2.0E6

Frequency and duration of : Continuous release use

**Environment factors not** influenced by risk management

Emission days 300

: Local freshwater dilution factor 10 Local marine water dilution factor 100

Other conditions affecting environmental exposure

: Release fraction to air from process (initial release prior to RMM) 1.0E-4 Release fraction to wastewater from process (initial release prior to RMM) 3.0E-6 Release fraction to soil from process (initial release prior to RMM) 0.0001

**Technical conditions and** measures at process level (source) to prevent release Common practices vary across sites thus conservative process release estimates used.

**Technical on-site** conditions and measures to reduce or limit discharges, air emissions and releases to soil

: Risk from environmental exposure is driven by humans via indirect exposure (primarily ingestion). On-site wastewater treatment required. Prevent discharge of undissolved substance to or recover from onsite wastewater. Treat air emission to provide a typical removal efficiency of 90

Treat on-site wastewater (prior to receiving water discharge) to provide the required removal efficiency of 85.9

If discharging to municipal sewage treatment plant, provide the required on-site wastewater removal efficiency of 0.0

**Organizational measures** to prevent/limit release from site

: Do not apply industrial sludge to natural soils. Sewage sludge should be incinerated, contained or reclaimed.

**Conditions and measures** related to sewage treatment plant

: Estimated substance removal from wastewater via on-site sewage treatment 88.8 Total efficiency of removal from wastewater after on-site and off-site (municipal treatment plant) RMMs 88.8

Maximum allowable site tonnage (M<sub>Safe</sub>) based on release following total wastewater

treatment removal 2.3E6

Assumed on-site sewage treatment plant flow 10000

## Section 2 Operational conditions and risk management measures

**Conditions and measures** related to external

: During manufacturing, no waste of the substance is generated.

treatment of waste for

disposal

**Conditions and measures** 

: During manufacturing, no waste of the substance is generated.

related to external recovery of waste

Contributing scenarios: Operational conditions and risk management measures

## Section 3 Exposure estimation and reference to its source

### Section 3.1: Health

**Exposure assessment** 

(human):

: The ECETOC TRA tool has been used to estimate workplace exposures unless

otherwise indicated.

**Exposure estimation and** reference to its source

: Not available.

#### Section 3.2: Environment

**Exposure assessment** (environment):

: Hydrocarbon Block Method (Petrorisk)

**Exposure estimation and** 

reference to its source

: Not available.

## Section 4 Guidance to check compliance with the exposure scenario

### Health

: Predicted exposures are not expected to exceed the DN(M)EL when the risk management measures/operational conditions outlined in section 2 are implemented. Where other risk management measures/operational conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. Available hazard data do not support the need for a DNEL to be established for other health effects. Risk management measures are based on qualitative risk characterisation.

## **Environment**

: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination. Further details on scaling and control technologies are provided in SPERC factsheet. Scaled local assessments for EU refineries have been performed using site-specific data and are attached in PETRORISK file - "Site-Specific Production" worksheet.

: Risk from environmental exposure is driven by humans via indirect exposure (primarily ingestion). If discharging to municipal sewage treatment plant, no on-site wastewater treatment required. Prevent discharge of undissolved substance to or recover from onsite wastewater.

Treat air emission to provide a typical removal efficiency of 0

Treat on-site wastewater (prior to receiving water discharge) to provide the required removal efficiency of 54.0

If discharging to municipal sewage treatment plant, provide the required on-site wastewater removal efficiency of 0

**Organizational measures** to prevent/limit release from site

: Do not apply industrial sludge to natural soils. Sewage sludge should be incinerated, contained or reclaimed.

## Section 2 Operational conditions and risk management measures

Conditions and measures related to sewage treatment plant

: Estimated substance removal from wastewater via on-site sewage treatment 88.8 Total efficiency of removal from wastewater after on-site and off-site (municipal treatment plant) RMMs 88.8

Maximum allowable site tonnage ( $M_{\text{Safe}}$ ) based on release following total wastewater treatment removal 1.1E5

Assumed on-site sewage treatment plant flow 2000

Conditions and measures related to external treatment of waste for disposal

: External treatment and disposal of waste should comply with applicable local and/or national regulations.

Conditions and measures related to external recovery of waste

: External recovery and recycling of waste should comply with applicable local and/or national regulations.

Contributing scenarios: Operational conditions and risk management measures

## Section 3 Exposure estimation and reference to its source

### Section 3.1: Health

Exposure assessment (human):

: The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

Exposure estimation and reference to its source

: Not available.

#### **Section 3.2: Environment**

Exposure assessment (environment):

: Hydrocarbon Block Method (Petrorisk)

**Exposure estimation and reference to its source** 

: Not available.

## Section 4 Guidance to check compliance with the exposure scenario

## Health

Predicted exposures are not expected to exceed the DN(M)EL when the risk management measures/operational conditions outlined in section 2 are implemented. Where other risk management measures/operational conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. Available hazard data do not enable the derivation of a DNEL for dermal irritant effects. Available hazard data do not support the need for a DNEL to be established for other health effects. Risk management measures are based on qualitative risk characterisation.

### **Environment**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures. Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination. Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination. Further details on scaling and control technologies are provided in SPERC factsheet.

Industrial

### Identification of the substance or mixture

**Product definition** : UVCB

**Product name** : Q8 Fuelolie 45

### **Section 1 Title**

Short title of the exposure

scenario

: Use of Heavy Fuel Oil as a Fuel - Industrial

List of use descriptors

: Identified use name: Use in fuel - Industrial

Process Category: PROC01, PROC02, PROC03, PROC08a, PROC08b, PROC16

Substance supplied to that use in form of: As such

Sector of end use: SU03

Subsequent service life relevant for that use: No.

Environmental Release Category: ERC07, ESVOC SPERC 7.12a.v1

Market sector by type of chemical product: PC13

Article category related to subsequent service life: Not applicable.

**Processes and activities** covered by the exposure

scenario

: Covers the use as a fuel (or fuel additives and additive components) within closed or contained systems, including incidental exposures during activities associated with

its transfer, use, equipment maintenance and handling of waste.

**Assessment method** : See section 3.

## Section 2 Operational conditions and risk management measures

#### Section 2.1 Control of consumer exposure

**Concentration of** substance in mixture or

article

: Covers percentage substance in the product up to 100% (unless stated differently).

: Liquid, vapor pressure < 0.5 kPa at Standard Temperature and Pressure

**Physical state** 

use/exposure

Frequency and duration of : Covers daily exposures up to 8 hours

Other conditions affecting

: Assumes use at not more than 20°C above ambient temperature, unless stated differently. Assumes a good basic standard of occupational hygiene is implemented workers exposure

### Contributing scenarios: Operational conditions and risk management measures

General measures (carcinogens): Consider technical advances and process upgrades (including automation) for the elimination of releases.

Minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation.

Drain down systems and clear transfer lines prior to breaking containment.

Clean/flush equipment, where possible, prior to maintenance.

Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenarios; clear up spills immediately and dispose of wastes safely.

Ensure safe systems of work or equivalent arrangements are in place to manage risks.

Regularly inspect, test and maintain all control measures.

Consider the need for risk-based health surveillance.

General exposures (closed systems): Handle substance within a closed system. Sample via a closed loop or other system to avoid exposure. Avoid carrying out activities involving exposure for more than 4 hours. Wear chemicalresistant gloves (tested to EN374) in combination with 'basic' employee training.

General exposures (closed systems) Product sampling: Handle substance within a closed system. Sample via a closed loop or other system to avoid exposure. Avoid carrying out operation for more than 1 hour. Provide a good

## Section 2 Operational conditions and risk management measures

standard of controlled ventilation (10 to 15 air changes per hour). Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Bulk closed unloading Outdoor: Transfer via enclosed lines. Avoid carrying out activities involving exposure for more than 4 hours. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Drum/batch transfers: Ensure material transfers are under containment or extract ventilation. or Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Avoid carrying out operation for more than 1 hour. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Operation of solids filtering equipment: Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Avoid carrying out activities involving exposure for more than 4 hours. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Bulk product storage: Store substance within a closed system. Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Avoid carrying out activities involving exposure for more than 4 hours. Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Use in fuel (Closed system): Wear chemical-resistant gloves (tested to EN374) in combination with 'basic' employee training.

Equipment cleaning and maintenance: Drain down and flush system prior to equipment break-in or maintenance. Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training. Retain drain-downs in sealed storage pending disposal or for subsequent recycle.

## Section 2.2 Control of environmental exposure

## **Product characteristics**

**Amounts used** 

- : Substance is complex UVCB.. Predominantly hydrophobic
- : Fraction of EU tonnage used in region 0.1

Regional use tonnage 1.1E7

Fraction of regional tonnage used locally 1.4E-1

Annual site tonnage 1.5E6

Maximum daily site tonnage 5.0E6

Frequency and duration of : Continuous release

use

**Environment factors not** influenced by risk management

Emission days 300

: Local freshwater dilution factor 10 Local marine water dilution factor 100

Other conditions affecting environmental exposure

: Release fraction to air from process (initial release prior to RMM) 7.0E-4 Release fraction to wastewater from process (initial release prior to RMM) 4.4E-7 Release fraction to soil from process (initial release prior to RMM) 0

**Technical conditions and** measures at process level (source) to prevent release : Common practices vary across sites thus conservative process release estimates used.

**Technical on-site** conditions and measures to reduce or limit discharges, air emissions and releases to soil

: Risk from environmental exposure is driven by freshwater sediment. On-site wastewater treatment required. Prevent discharge of undissolved substance to or recover from onsite wastewater.

Treat air emission to provide a typical removal efficiency of 95

Treat on-site wastewater (prior to receiving water discharge) to provide the required removal efficiency of 87.7

If discharging to municipal sewage treatment plant, provide the required on-site wastewater removal efficiency of 0

**Organizational measures** to prevent/limit release from site

: Do not apply industrial sludge to natural soils. Sewage sludge should be incinerated, contained or reclaimed.

**Conditions and measures** related to sewage treatment plant

: Estimated substance removal from wastewater via on-site sewage treatment 88.8 Total efficiency of removal from wastewater after on-site and off-site (municipal treatment plant) RMMs 88.8

Maximum allowable site tonnage (M<sub>Safe</sub>) based on release following total wastewater

treatment removal 5.2E6

Assumed on-site sewage treatment plant flow 2000

## Section 2 Operational conditions and risk management measures

Conditions and measures related to external treatment of waste for disposal

: Combustion emissions limited by required exhaust emission controls. Combustion emissions considered in regional exposure assessment.

Conditions and measures related to external recovery of waste

 This substance is consumed during use and no waste from the substance is generated.

Contributing scenarios: Operational conditions and risk management measures
